AI Behavioral Report

Academic Behavioral Report

This report provides an in-depth analysis of the behavioral patterns exhibited by players P1_qwen3_8b and P4_qwen3_32b throughout the game. The observations are based on the game history, which includes all actions, trades, and decisions made by both players.

Player P1_qwen3_8b's Behavioral Patterns

P1_qwen3_8b demonstrated a mix of risk-taking and cautious behavior throughout the game. Initially, they focused on acquiring properties and building houses to increase their rental income. However, as the game progressed, they became more aggressive in their trading strategies, often proposing trades that would disrupt P4_qwen3_32b's potential monopolies.

P1_qwen3_8b also exhibited a tendency to prioritize short-term gains over long-term strategic planning. For instance, they mortgaged properties to raise capital for immediate needs rather than waiting for more opportune moments to do so. This approach sometimes led to financial difficulties and limited their ability to respond to changing circumstances.

Despite these challenges, P1_qwen3_8b showed resilience and adaptability in the face of adversity. They adjusted their strategies as the game unfolded, attempting to capitalize on new opportunities and
